Physician Assistant Studies

The Physician Assistant (PA) graduate programs are offered through the Department of Family and Community Medicine in the School of Medicine.

Master of Science Physician Assistant (M.S.P.A.) in Physician Assistant Studies

The physician assistant is often the first health care provider to see a patient and perform a variety of tasks, including collecting historical and physical examination data from the patient and ordering appropriate laboratory and diagnostic tests. The physician assistant synthesizes patient information and participates in formulating and executing a treatment plan to meet the patient’s needs. A physician assistant can evaluate psychological aspects of a patient’s health, counsel when appropriate, and teach patients about primary health problems. The physician assistant makes referrals when indicated and can perform procedures, such as EKGs, venipuncture, casting, suturing, and injections. The physician assistant prescribes medications. Graduates of the PA Program are trained as primary care providers and awarded the Master of Science in Physician Assistant Studies (M.S.P.A.) degree.

The program utilizes a problem-based learning curriculum and clinical rotations to prepare primary care physician assistants to practice medicine with physician supervision.

Admission

To be considered for the enrollment in the Physician Assistant M.S.P.A program prospective students must have a 3.2 GPA or above in overall, science, prerequisite GPAs and complete the program prerequisites and other requirements.

This program requires a nonrefundable $65 application fee (subject to change without notice by the SIU Board of Trustees) that must be submitted with the application for admissions to graduate study in the Physician Assistant Program. We ask that you do not apply to the graduate school unless you are invited to interview.

Accepted applicants will be required to submit a nonrefundable enrollment deposit to reserve a position in the class. The deposit is due within 10 days of the program’s invitation to the applicant. The deposit will be applied to the student’s Bursar account two weeks after matriculation. If an applicant, who has accepted an offer for admission, decides to drop, the enrollment deposit will not be refunded.

M.S.P.A. students will not receive the border state decrease adjustment to their tuition and fees. Therefore, all out-of-state students will pay a higher tuition rate. No advanced placement is awarded towards completion of M.S.P.A. courses, even if the applicant is licensed as a medical doctor.

Degree Requirements

Prospective students must have completed all of the following prerequisite courses before matriculation:

- Medical Terminology - one semester or proficiency
- Chemistry with labs - two semesters (select from General, Inorganic, Organic, or Biochemistry)
- Psychology - one semester
- Human Physiology - one semester (upper level preferred)
- Human Anatomy – one semester (upper level with cadaver lab preferred)
• Microbiology with lab-one semester
• General Biology for science majors, - one semester (may also select from Genetics or Cell and Molecular Biology)
• Statistics-one semester -AND-
• English Composition - one semester

All prerequisite courses must be completed by the end of the fall semester (12/31) in an application cycle. We allow two exceptions to this: Students may complete one remaining prerequisite course (with a grade of A or B) and Medical Terminology (Pass or A/B) during the Spring semester prior to matriculation.

Students who have completed or will soon complete a Bachelor’s degree and prerequisite course requirements should contact the program’s admissions advisor or consult the program website for the most current application information.

Enrollment in the M.S.P.A. program is limited and based on a competitive process. Applicants will be evaluated on the overall submitted application package, including overall, science, and prerequisite GPAs that must each be a 3.2 on a 4.0 scale, academic potential, motivation, familiarity with the PA role, oral and written communication skills, interpersonal skills, and potential for success in the SIU Carbondale M.S.P.A. Program and the PA profession. Students will be selected by the Admissions Committee for an interview with a maximum of 40 being admitted to the professional sequence. The M.S.P.A. Program is extremely rigorous and outside employment while in the program is discouraged.

Students selected for the professional sequence will begin study in the summer session. Those accepted into the M.S.P.A. program will be notified of acceptance by the spring semester prior to the summer of entry. The curriculum is a 26-month sequence with the first 12 months (Phase I) consisting of problem-based learning activities, basic science and clinical medicine courses, and clinical experiences. The next 14 months consist of clinical rotations with seminars (Phase II) and a summer preceptorship (Phase III). All students complete a Master’s Project before graduation. During the clinical rotation phase, students may be required to relocate to other locations or Hubsites throughout Illinois and one in Southeast Missouri. More information on deadlines or other requirements can be obtained from the M.S.P.A. program's admissions advisor at: paadvisement-L@listserv.siu.edu. All courses are restricted to students in the M.S.P.A. program.

First Year Sequence (Phase I) - 54 credit hours

PA 500, PA 501, PA 502, PA 503, PA 504, PA 505, PA 506, PA 507, PA 511, PA 512, PA 513, PA 514, PA 515, PA 521, PA 522, PA 523, PA 524, PA 525, PA 531, PA 532, PA 533, PA 534, PA 535, PA 536, PA 547, PA 550, PA 599

Second Year (Phase II & Phase III) - 36 credit hours

PA 545, PA 551, PA 580, PA 581, PA 582, PA 583, PA 596, PA 599

Total - 90 credit hours

Curricular Guide

Phase I

• Semester 1 – Summer (Unit 1) – 10 Credit Hours
  • PA 500: Introduction to the Profession (1 CH)
  • PA 501: PBL, Unit 1 (3 CH)
  • PA 511: Pharmacology I (1 CH)
  • PA 521: Clinical Anatomy and Integrated Sciences I (2 CH)
  • PA 531: Patient Evaluation I (2 CH)
  • PA 547: Research Methods (1 CH)

• Semester 2 – Fall (Units 2 & 3) – 22 Credit Hours
  • PA 502 -AND- PA 503: PBL, Units 2 and 3 (3 CH each)
  • PA 506: Patient Education/Behavioral Science (1 CH)
  • PA 507: Diversity in Medical Practice (1 CH)
  • PA 512 -AND- PA 513: Pharmacology II, III (1 CH each)
  • PA 522 -AND- PA 523: Clinical Anatomy and Integrated Sciences II, III (2 CH each)
• PA 532 -AND- PA 533: Patient Evaluation II, III (2 CH each)
• PA 550: Clinical Mentoring - Phase I (2 CH)
• PA 599: Master’s Seminar (2 CH)

**Semester 3 – Spring (Units 4 & 5) – 22 Credit Hours**
• PA 504 -AND- PA 505: PBL, Units 4 and 5 (3 CH each)
• PA 506: Patient Education/Behavioral Science (1 CH)
• PA 514 -AND- PA 515: Pharmacology IV, V (1 CH each)
• PA 524 -AND- PA 525: Clinical Anatomy and Integrated Sciences IV, V (2 CH each)
• PA 534: Clinical/Procedural Skills (2 CH)
• PA 535: ACLS/EKG (2 CH)
• PA 536: Introduction to the Surgical Setting (1 CH)
• PA 550: Clinical Mentoring – Phase I (2 CH)
• PA 599: Master’s Seminar (2 CH)

Phase II

**Semester 4 – Summer – 6 Credit Hours**
• PA 551: Clinical Mentoring – Phase II (1 CH)
• PA 580: PBL Tutor Group – Phase II (1 CH)
• PA 581: Clinical Rotations I (3 CH)
• PA 599: Master’s Seminar (1 CH)

**Semester 5 – Fall – 12 Credit Hours**
• PA 551: Clinical Mentoring – Phase II (2 CH)
• PA 580: PBL Tutor Group – Phase II (2 CH)
• PA 582: Clinical Rotations II (6 CH)
• PA 599: Master’s Seminar (2 CH)

**Semester 6 – Spring – 12 Credit Hours**
• PA 551: Clinical Mentoring – Phase II (2 CH)
• PA 580: PBL Tutor Group – Phase II (2 CH)
• PA 583: Clinical Rotations III (6 CH)
• PA 599: Master’s Seminar (2 CH)

Phase III

**Semester 7 – Summer – 6 Credit Hours**
• PA 545: Health Care Systems (3 CH)
• PA 596: Preceptorship (3 CH)

A limited number of electives are also accepted:

**PA Elective Courses:**

• PA 508: Holistic Medicine (1-3 CH)
• PA 585: Independent Study (1-6 CH)

**PA Continuing Enrollment:**

• PA 601: (1 CH)

Used to complete the M.S.P.A. project if all other program requirements are met.

For more information on the M.S.P.A. degree offered by the Physician Assistant Program, visit our web site at: siumed.edu/paprogram or email the Program’s Admissions Advisor.
Physician Assistant Studies Courses

PA500 - Introduction to the PA Profession  This course is designed to provide students with an understanding of professional issues of the Physician Assistant. Students are introduced to physician assistant history, standards of quality assurance, credentialing and licensure, regulations governing practice, business issues, and contract negotiation. Students explore opportunities in professional organizations and ways to strengthen their professional development. Credit Hours: 1

PA501 - Problem Based Learning Group, Unit 1  This course is designed to focus on medical topics in cardiology and gastroenterology. Problem-based learning is utilized with emphasis on expanding the student's knowledge base, enhancing the student's clinical reasoning skills and self-directed learning, and improving interpersonal communication skills among students and patients. Limited to six to nine students per section. Credit Hours: 3

PA502 - Problem Based Learning Group, Unit 2  This course is designed to focus on internal medicine topics in respiratory medicine, dermatology, urology, and infectious disease. Problem based learning is used with emphasis on expanding the student's knowledge base, enhancing clinical reasoning skills and self-directed learning, and improving interpersonal communication skills among students and patients. Credit Hours: 3

PA503 - Problem Based Learning Group, Unit 3  This course is designed to focus on internal medicine topics in neurological and psychiatric diseases. Problem-based learning is utilized with emphasis on expanding the student's knowledge base, enhancing the student's clinical reasoning skills and self-directed learning, and improving interpersonal communication skills among students and patients. Credit Hours: 3

PA504 - Problem Based Learning Group, Unit 4  This course is designed to focus on health concerns, physiological and psychosocial issues of obstetrics, gynecology, urology, and pediatric gastroenterology. Problem based learning is utilized in expanding the student's knowledge base, clinical reasoning skills, self-directed learning, and improving interpersonal communication skills. Credit Hours: 3

PA505 - Problem Based Learning Group, Unit 5  This course is designed to focus on medical topics related to endocrinology, renal disease, and metabolism. Problem-based learning is utilized with emphasis on expanding the student's knowledge base, enhancing the student's clinical reasoning skills and self-directed learning, and improving interpersonal communication skills among students and patients. Credit Hours: 3

PA506 - Behavioral Science/Patient Education  This course explores behavioral science and patient education as it applies to the practice of medicine, as well as maintenance of health and prevention of illness. Credit Hours: 1

PA507 - Diversity in Medical Practice  Students examine issues that arise when delivering medical services to persons of diverse cultures, ethnicity, race, sexual orientation, gender, and socioeconomic status. Implications for providing medical services to persons who have experienced discrimination and disadvantage will be discussed. Credit Hours: 1

PA508 - Holistic Medicine  This course is designed to explore the current research, practice and applications of Mind-Body-Spirit Medicine (MBSM). Students will explore the use of various techniques for use in clinical and therapeutic settings as well as for maintaining their own personal health. Credit Hours: 1

PA511 - Pharmacology I  This course introduces students to the therapeutic agents most commonly used for treatment of disorders of the cardiovascular and gastrointestinal systems. The practical aspects of dosage, schedules, therapeutic effect, adverse reactions, metabolism, mechanism of action and excretion are investigated. Credit Hours: 1

PA512 - Pharmacology II  This course introduces students to the therapeutic agents most commonly used involving the pulmonary and integumentary systems, as well as those medications used in infectious disease. The practical aspects of dosage, schedules, therapeutic effect, adverse reactions, metabolism, method of action and excretion are investigated. Credit Hours: 1
PA513 - Pharmacology III This course introduces students to the therapeutic agents most commonly used in neurology and psychiatry. The practical aspects of dosage, schedules, therapeutic effect, adverse reactions, metabolism, method of action and excretion are investigated. Credit Hours: 1

PA514 - Pharmacology IV This course introduces students to the therapeutic agents most commonly used in practice involving pregnancy, neonates, infants, sexually transmitted diseases, menopause, and prostate disorders. The practical aspects of dosage, schedules, therapeutic effect, adverse reactions, metabolism, method of action and excretion are investigated. Credit Hours: 1

PA515 - Pharmacology V This course introduces students to the therapeutic agents most commonly used in treating diabetes, thyroid disorders, renal disease, and fluid disorders. The practical aspects of dosage, schedules, therapeutic effect, adverse reactions, metabolism, method of action and excretion are investigated. Credit Hours: 1

PA521 - Clinical Anatomy and Integrated Sciences I This course involves the study of anatomical structures with cadaveric materials, clinical applications, physiology and pathophysiology of selected systems. Radiology, microscopy, and embryology issues will be included. Credit Hours: 2

PA522 - Clinical Anatomy and Integrated Sciences II This course involves the study of anatomical structures with cadaveric materials, clinical applications, physiology and pathophysiology of selected systems. Radiology, microscopy, and embryology issues will be included. Credit Hours: 2

PA523 - Clinical Anatomy and Integrated Sciences III This course involves the study of anatomical structures with cadaveric materials, clinical applications, physiology and pathophysiology of selected systems. Radiology, microscopy, and embryology issues will be included. Credit Hours: 2

PA524 - Clinical Anatomy and Integrated Sciences IV This course involves the study of anatomical structures with cadaveric materials, clinical applications, physiology and pathophysiology of selected systems. Radiology, microscopy, and embryology issues will be included. Credit Hours: 2

PA525 - Clinical Anatomy and Integrated Sciences V This course involves the study of anatomical structures with cadaveric materials, clinical applications, physiology and pathophysiology of selected systems. Radiology, microscopy, and embryology issues will be included. Credit Hours: 2

PA531 - Patient Evaluation I This course is designed to prepare the Physician Assistant student in taking a patient history and performing portions of the physical exam. Interview and communication skills, medical terminology, and recording patient information are also explored. Credit Hours: 2

PA532 - Patient Evaluation II This course is designed to build on student's knowledge of pertinent physical exam skills, and increase knowledge regarding the medical history and clinical procedures. Students continue to improve skills in areas of the patient interview, medical terminology, and recording patient information. Credit Hours: 2

PA533 - Patient Evaluation III This course is designed to build on students' knowledge of physical exam skills, introduce new systems, and improve skills in areas of the patient interview, medical terminology, and recording patient information. Credit Hours: 2

PA534 - Clinical Procedural Skills Students develop and expand their skills in performance of clinical procedural skills needed for competency in office and hospital-based practice. Topics will include central line placement, IV therapy, EKG, lumbar puncture, venipuncture, casting, suturing, and thoracentesis. Credit Hours: 2

PA535 - EKG and Advanced Cardiac Life Support (ACLS) EKG/ACLS is designed to provide the knowledge and skills needed to read EKGs and to evaluate and manage the first ten minutes of an adult ventricular fibrillation/tachycardia arrest. Students learn to manage ten core ACLS cases, a respiratory emergency, four types of cardiac arrest, four types of pre-arrest emergencies, and stroke. Credit Hours: 2

PA536 - Introduction to the Surgical Setting During this course, the student will be exposed to the various aspects of the general surgical setting. Fundamentals to be introduced include pre- and post-operative care, sterile technique, gowning and gloving, and the identification of surgical instruments. Credit Hours: 1
PA545 - Health Care Systems This course is designed to cover the following topics: delivery of health care, standards of care and guidelines as they affect practice issues, cost and effectiveness, economics of health care, insurance and health care, indigent medical care, the health workforce, access to care, health policy, and technology (electronic medical records, email, telemedicine). Credit Hours: 3

PA547 - Research Methods and Evidence Based Medicine (EBM) This course focuses on scientific inquiry within the Physician Assistant practice, covering the application of basic research methodology including problem formation, research designs, sampling, measurement, data analysis, technical writing and dissemination of research results, and research ethics. Students will also focus on developing evidence-based medicine (EBM) skills. Credit Hours: 1-4

PA550 - Clinical Mentoring - Phase I Students gain clinical experience in the community setting by participating in a one-half day per week continuity clinic in Family Medicine with a designated mentor. Students register for this course during the first fall semester of the program. They register again for this course in the spring semester, until Phase II. Credit Hours: 1-2

PA551 - Clinical Mentoring - Phase II Students continue to gain clinical experience in the community setting by participating in a one-half day per week continuity clinic in Family Medicine with a designated mentor. Students register for this course during the second summer semester of the program. They register again for this course in subsequent semesters, until the Preceptorship. Maximum hours per term are 2. Credit Hours: 1-2

PA580 - Problem Based Learning (PBL) Group Phase II Phase II students participate in a one-half day per week problem-based learning tutor group, in which they engage in the Barrowsian method of problem-based learning at respective Hubsites. This course is designated to foster independence in clinical reasoning and knowledge synthesis by working through patient problems, as well as improving the application of knowledge to clinical practice. Credit Hours: 1-2

PA581 - Clinical Rotations I This is the first (summer semester) in a three course sequence of supervised clinical experience in a variety of settings and nine specialty areas. Credit Hours: 3

PA582 - Clinical Rotations II This is the second course (fall semester) in a three course sequence of supervised clinical experience in a variety of settings and nine specialty areas. Credit Hours: 6

PA583 - Clinical Rotations III This is the third course (spring semester) in a three course sequence of supervised clinical experience in a variety of settings and nine specialty areas. Credit Hours: 6

PA585 - Independent Study Directed independent study in selected areas of Physician Assistant studies. Credit Hours: 1-6

PA596 - Preceptorship The eight week preceptorship simulates the role of the Master's prepared graduate Physician Assistant, with supervision by the clinical preceptor. This is generally completed in a primary care area of medicine. Credit Hours: 3

PA599 - Master's Seminar This is a longitudinal course taken over several semesters in which students work on proposal design, development, construction, research, writing, and project presentation. The Master's Seminar culminates in defense of a Grand Rounds Presentation, Community Project Presentation, or a published Problem-Based Learning Module and Tutor Guide. Restricted to Physician Assistant majors. Credit Hours: 1-8

PA601 - Continuing Enrollment For graduate students who have not completed the program and are in the process of their Master's Project. The student must have completed all other program requirements to be eligible to register for this course. Concurrent enrollment in any other courses is not permitted. S/U or DEF grades only. Prerequisite: Completion of all Program coursework except PA 599. Credit Hours: 1
Physician Assistant Studies Faculty

Master of Science Physician Assistant (M.S.P.A.) in Physician Assistant Studies Faculty

Arnold, Angela, Assistant Professor of Family and Community Medicine, Doctor of Medical Science, PA-C, Southern Illinois University Carbondale, 2022; 2022.

Barke, Halley, Assistant Professor of Family and Community Medicine and Director of Clinical Education-Physician Assistant Program, Doctor of Medical Science, PA-C, Southern Illinois University Carbondale, 2022; 2017.

Bueza, Jesse Paul, Assistant Professor of Family and Community Medicine, Doctor of Medical Science, PA-C, Southern Illinois University Carbondale, 2022; 2023.

Diemer, Donald, Professor of Family and Community Medicine and Associate Chair and Program Director-Physician Assistant Programs, Doctor of Health Sciences, PA-C, A.T. Still University, 2011; 2011.

Diemer, Joeli, Assistant Professor of Family and Community Medicine and Academic Coordinator, Doctor of Medical Science, PA-C, Southern Illinois University Carbondale, 2023; 2021.

Hagerman, Daniel, Assistant Professor of Family and Community Medicine, Doctor of Medical Science, PA-C, Southern Illinois University Carbondale, 2022; 2019.

Henson, Macy, Assistant Professor of Family and Community Medicine, MSPA, PA-C, Southern Illinois University Carbondale, 2018; 2019.

Ledbetter, Courtney, Assistant Professor of Family and Community Medicine, Doctor of Medical Science, PA-C, Southern Illinois University Carbondale, 2022; 2020.

Reaney (Wittnam), Amanda, Assistant Professor of Family and Community Medicine, Doctor of Medical Science, PA-C, Southern Illinois University Carbondale, 2022; 2018.

Reichert, Rob, Instructor of Family and Community Medicine, Doctor of Pharmacy, RPh, St. Louis College of Pharmacy, 2011; 2015.

Schloemann, L. Kristen, Assistant Professor of Family and Community Medicine, MSPA, PA-C, Southern Illinois University Carbondale, 2012; 2020.

Scott, M. Kate, Associate Professor of Family and Community Medicine and Associate Program Director-Physician Assistant Program, Doctor of Medical Science, PA-C, University of Lynchburg, 2021; 2016.

Smith, Sidney, Assistant Professor of Family and Community Medicine, M.D., Northwestern University School of Medicine, 1965, 1971.

Waldyke, Kathryn, Assistant Professor of Family and Community Medicine, M.D., Michigan State University, 1990; 2011.
